Index to Volume 25 (1993)

No 1 (January) pp 1–72
No 2 (February) pp 73–136
No 3 (March) pp 137–200
No 4 (April) pp 201–264
No 5 (May) pp 265–328
No 6 (June) pp 329–392
No 7 (July) pp 393–464
No 8 (August) pp 465–520
No 9 (September) pp 521–616
No 10 (October) pp 617–680
No 11 (November) pp 681–736
No 12 (December) pp 737–808

Article index

January

Automated feature recognition from 2D drawings
S. Meeran and M. J. Pratt 7
Protrusion-features handling in design and manufacturing planning
M. A. Chamberlain, A. Joneja and T.-C. Chang 19
FSMT: a feature solid-modelling tool for feature-based design and manufacture
W. Duan, J. Zhou and K. Lai 29
Sufficient condition for correct topological form in tolerance specification
N. F. Stewart 39
Solving VLSI physical design problems on a vector machine
C. P. Ravikumar 49
Using a truth-maintenance system to assist product-model construction for design and process planning
M. Inui and F. Kimura 59

February

Probabilistic characterization of controllability in general homogeneous circuits
A. Majumdar and S. Sastry 76
Device-independent programming environments for CAD/CAM software creation
S. Jayaram and A. Myklebust 94
Automated modeling and kinematic simulation of mechanisms
E. Sacks and L. Joskowicz 106
Topological operators and Boolean operations for complex-based nonmanifold geometric models
H. Masuda 119
The engineering design functions which the computer can most effectively aid
E. H. Masters 130

March

Tetrahedron-based octree encoding for automatic mesh generation
Y. H. Jung and K. Lee 141
Shape offsets via level sets
R. Kimmel and A. M. Bruckstein 154
Best linear common divisors for approximate degree reduction
T. W. Sederberg and G.-Z. Chang 163
Algorithm for circle approximation and generation
L. Yong-Kui 169
High-quality solid-modelling system with free-form surfaces
M. Higashi 172
Computer methods for electrostatic-field determination and ray tracing in image intensifiers
A. M. Stark 184

April

Methodology for computer-aided design and analysis of passive solar buildings
A. K. Athienitis and E. Akhniotis 203
Realtime 3D simulation of 3-axis milling using isometric projection
P.-L. Hsu and W.-T. Yang 215
Constraint-satisfying planar development of complex surfaces
L. Parida and S. P. Mudur 225
Dimensional measurement of surfaces and their sampling
T. C. Woo and R. Liang 233
Computer-aided optimal design via modified adaptive random-search algorithm
H. Zarefar and S. N. Muthukrishnan 240
Test for intersection between plane and box
H. Ratschek and J. Rokne 249
Curve and surface design using Multipatch and Multiobject design systems
A. P. Armit 251

May

Efficient multiple-way network-partitioning algorithm
J.-U. Kim, C.-H. Lee and M. Kim 269
Nearly arc-length parameterized quintic-spline interpolation for precision machining
F.-C. Wang and D. C. H. Yang 281
Improved turbine-blade design techniques using 4th-order parametric-spline segments
T. Korakianitis and G. I. Pantazopoulos 289
Computer-aided mechanism design: a symbolic-computing approach
A. K. Dhingra and N. K. Mani 300
Project manager with quality assurance
J. Duhovnik, J. Tavčar and J. Koporec 311
Automatic nodal triangulation for finite elements
C. B. Saw and R. G. Smith 321

June

Representation scheme for defining and operating form features
L.-C. Sheu and J. T. Lin 333
Planar cubics through a point in a direction
J. J. Chou and M. W. Blake 348
Managing the shape of planar splines by their control polygons
E. Kantorowitz and Y. Schechner 355
Smooth biarc curves
J. Schönherr 365
Approximating quadratic NURBS curves by arc splines
D. S. Meek and D. J. Walton 371

Cutter-location data optimization in 5-axis surface machining
B. K. Choi, J. W. Park and C. S. Jun 377
Photomontage system for site planning
P. D. Lever 387

July

Feedback approach to design for assembly by evaluation of assembly plan
W. Hsu, C. S. G. Lee and S. F. Su 395
Fairing of surfaces with optimization techniques using FANGA curves as the quality criterion
G. Lidén and S. K. E. Westberg 411
Feature extraction of concave and convex regions and their intersections
D. H. Lentz and R. Sowerby 421
Pseudoedge: nonintersected parametric quilt modeling of multiply connected objects
D. L. Bonner, M. J. Jakiela, M. Watanabe and N. Kishi 438
Through the looking glass – why no wonderland? Computer applications in architecture in the USA
C. M. Eastman 453

August

Top-down geometric modelling of buildings on network database
C.-K. Choi and E.-D. Kim 468
Feature modelling by incremental feature recognition
T. Laakko and M. Mäntylä 479
Computer-aided optimum selection of roller bearings
J. Ahluwalia, S. K. Gupta and V. P. Agrawal 493
Active occurrence-matrix-based approach to design decomposition
N. Sridhar, R. Agrawal and G. L. Kinzel 500
CONSURF. Part 1: Introduction of the conic lofting tile
A. A. Ball 513

September

Special Issue: Uncertainties in geometric design
Guest Editor: Professor Tony C. Woo, University of Michigan, USA

Floating-point numbers with error estimates
G. Masotti 524
Robustness of numerical methods in geometric computation when problem data is uncertain
H. Desaulniers and N. F. Stewart 539
Robust polygon modelling
V. Milenkovic 546
Robustness in solid modelling: a tolerance-based intuitionistic approach
S. Fang, B. Bruderlin and X. Zhu 567
Representational primitives for geometric tolerancing
J. Guilford and J. Turner 577
Solid-model generation from measured point data
P. N. Chivate and A. G. Jablokow 587
Optimal tolerance allotment using a genetic algorithm and truncated Monte Carlo simulation
J. Lee and G. E. Johnson 601

October

Design of developable surfaces using duality between plane and point geometries
R. M. C. Bodduluri and B. Ravani 621
Quadric-surface intersection curves: shape and structure
I. Wilf and Y. Manor 633
Hodograph approach to geometric characterization of parametric cubic curves
D.-S. Kim 644
Design and machining of cylindrical cams with translating conical followers
D. M. Tsay and H. M. Wei 655
Method for offset-curve generation for sheet-metal design
K. Wentland and D. Dutta 662
Human factors in interactive graphics
R. Spence 671

November

Approximation of variable-radius offset curves and its application to Bézier brush-stroke design
M.-S. Kim, E.-J. Park and S.-B. Lim 684
Optimization of a NURBS representation
P. Laurent-Gengoux and M. Mekhilef 699
Evaluation of a Delaunay-based method for surface approximation
P.- O. Fjällström 711
Computer-aided design of multispeed gearboxes
I. Hüseyin Filiz and M. Dülger 720
Spacebar: kinematic design by computer graphics
R. J. Ricci 727

December

Constraint Definition System: a computer-algebra based approach to solving geometric-constraint problems
S. A. Buchanan and A. de Pennington 741
Disassembly sequences for objects built from unit cubes
D. Beasley and R. R. Martin 751
Parting directions for mould and die design
L.-L. Chen, S.-Y. Chou and T. C. Woo 762
Dynamic NC simulation of milling operations
Y. S. Tarng and W. S. Chang 769
World survey of computer-aided design
J. Hatvany, W. M. Newman and M. A. Sabin 776
